

# UBE Umbraco: How Cells display on different Devices

Please read "[Using the Common Page's Content tab](#)" first.

A Page layout that contains sub-pages displays the Sub-pages side-by-side on a desktop and one below the other on a mobile device.

To understand how the Layouts, Cells and Elements are laid out, consider this example, a layout of a Page or Sub-Page in the Back-Office, which will be the same on a desktop.

The layout on a smartphone will be:
